- Informative
- Trustworthy
- Matter-of-fact

Recruiting

- Casual
- Sympathetic
- Cheerful
- Conversational
- Professional
- Friendly
- Smart
- Enthusiastic

Brand voice examples

Headlines

- 1. We build software that builds your bottom line.**
- 2. We provide on-demand product design and software engineering.**
- 3. Our goal is to build your company, not just your software.**

Body copy

Example 1

Dualboot is a business and software development company. When we build your software, it builds your bottom line. Our founders have 25 years of experience starting, leading and selling tech companies and products. We know what it takes - and will do whatever it takes - to help you succeed, too.

Example 2

We believe being honest and trustworthy are at the heart of our business. Our clients feel genuine collaboration because they know they can trust that our goal is the betterment and success of their business.

Logo

Our logo is designed to reflect connection and our commitment to working together as a team and with our partners — and we take pride in that.

Our color logo is our main logo and it is used only on a white background.

Logo lockup

For the immediate future, we will use our symbol and wordmark together to build brand recognition.

Horizontal logo

Download >

Download >

Download >

File types provided are .png, .jpg and .svg.; .png being the preferred format since it supports transparency. If you find .png to be too heavy, jpg is the next best option. If you need any additional formats get in touch with the Marketing team.

Vertical logo

Download >

Download >

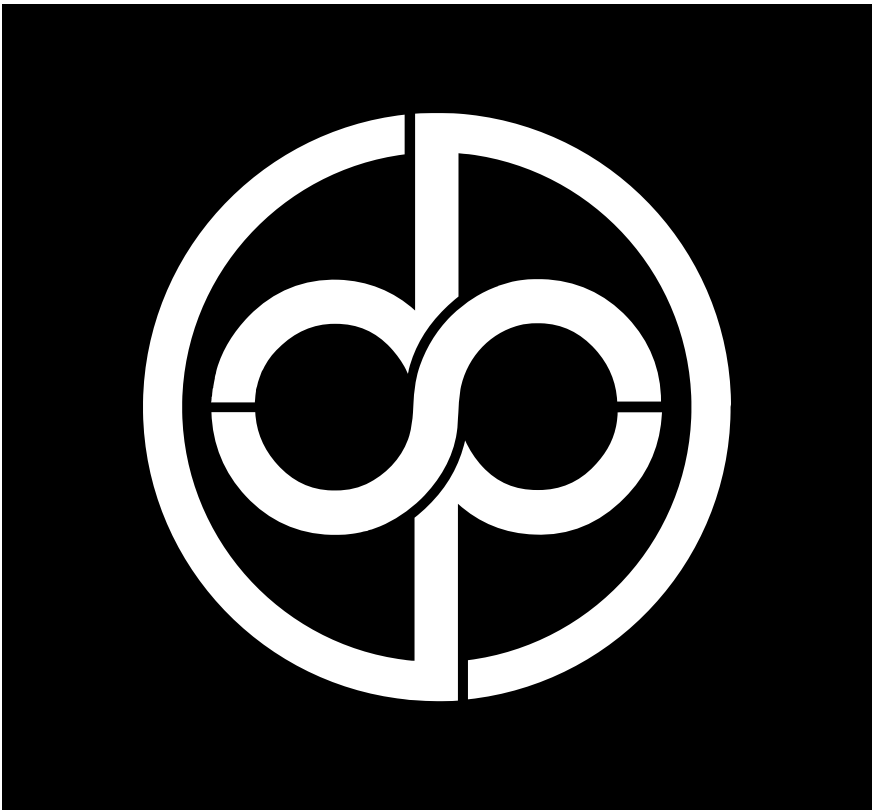

Download >

Icon or mark

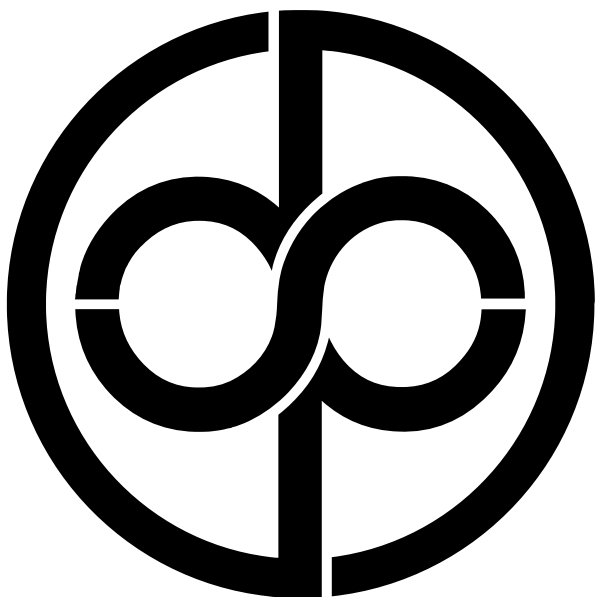

While our horizontal and vertical logos are preferred, sometimes a smaller, less detailed version is needed. Use our icon in those cases and on internal communications only.

Download >

Download >

Download >

Logo backgrounds

When using our logo over non corporate or photographic backgrounds, we should always use our logo in either black or white, depending on the lightness of the background.

Dark, non corporate color background

Light, non corporate color background

Dark photographic background

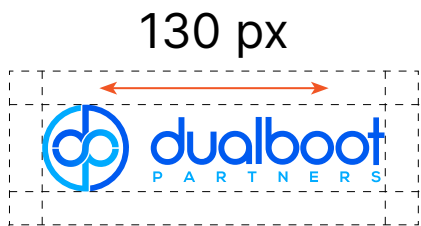

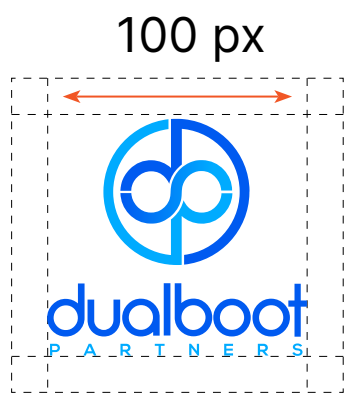

Light photographic background

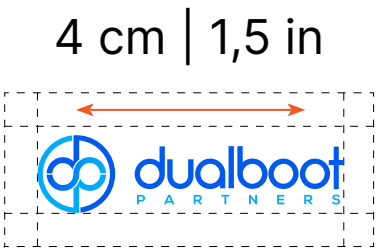

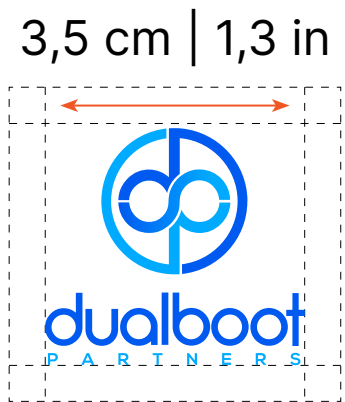

Minimum size
and clearspace

Minimum size

Please don't scale our logo below these sizes.

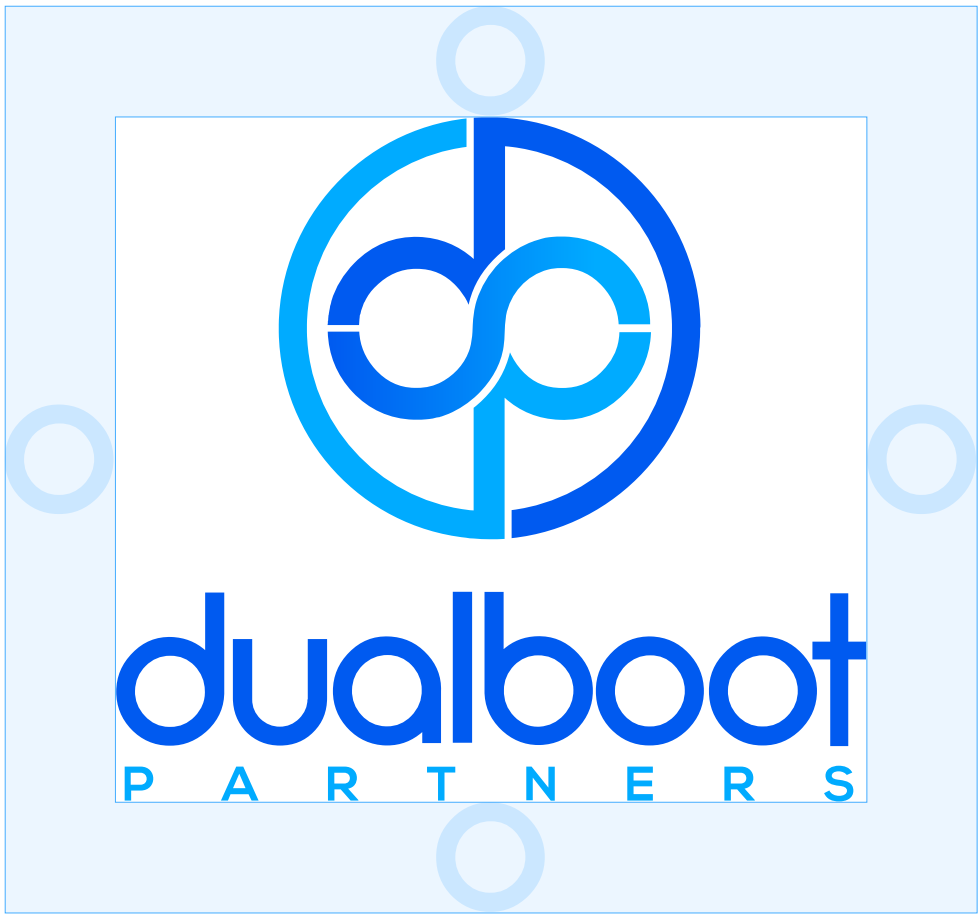

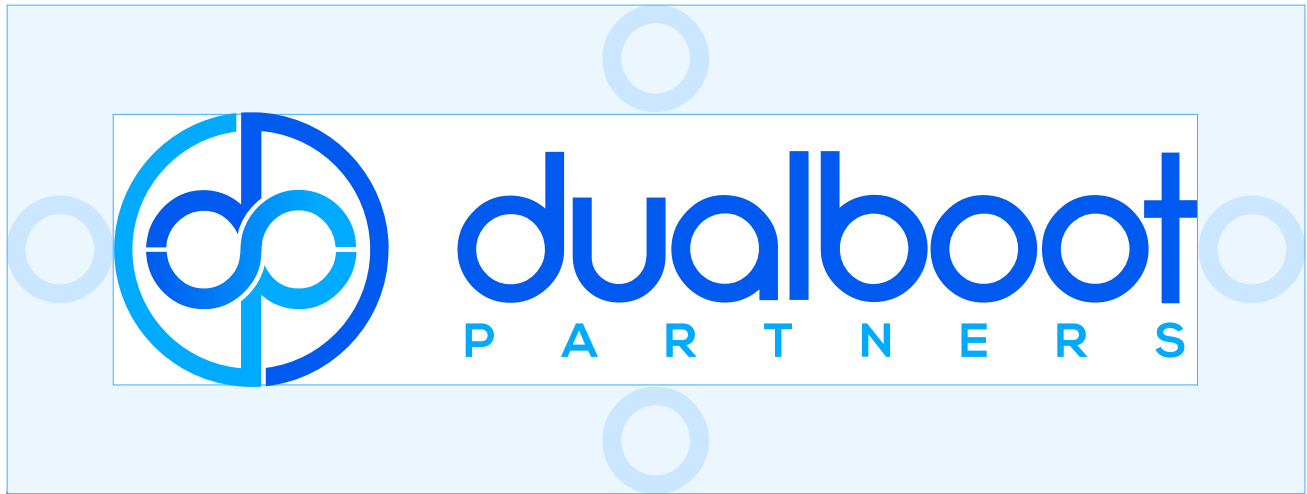

On screen

In print

Clearspace

This diagram shows the formula for creating the minimum margin of space around our logo. Its applicable to all of our logos.

Partnerships

These diagrams show how to create partner lockups.

The top and the bottom of the logos align with the ascender and baseline of the Dualboot logo.

Preferred background

The Dualboot logo should be used on a white background.

Placement

We use the logo either on the upper right, or down in the middle.

Black and white

The black and white logos should only be used when colored logos are not an option. These logos must have sufficient contrast between them and the background.

Incorrect usage

⊗ Don't change our logo lockup

⊗ Don't use unapproved color ways

⊗ Don't distort our logo

⊗ Don't apply effects to our logo

⊗ Don't tilt our logo

⊗ Don't alter our wordmark

⊗ Don't use our logo in a sentence

⊗ Don't add any elements to our logo

⊗ Don't use our colored logo over dark backgrounds

Tagline

WE BUILD GREAT SOFTWARE

We are not just a company that develops software based on success. We have a vision, a culture of innovation and a passion for excellence that drives our team to create technology solutions that really work.

Building long lasting relationships with our clients is our primary goal, so we go the extra mile to make sure your satisfaction is fulfilled. Every experience has the potential to change someone's life in some way — whether it's a big transformation or a daily task.

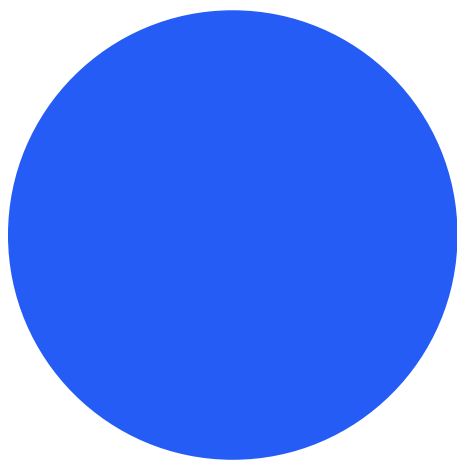

Color palette

The boldness of the blue is highlighted by the simplicity of black and white. Our colors represent a bold and driven company that's committed to going the extra mile.

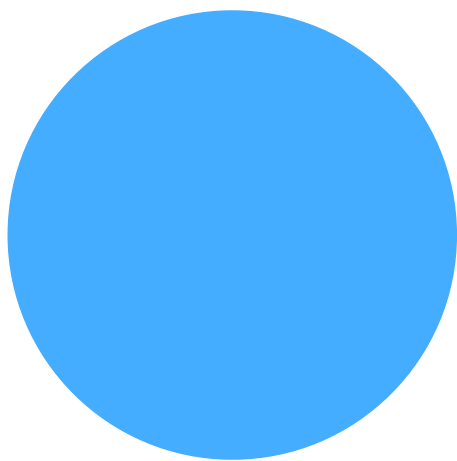

Color palette - hierarchy

Blue is our main color, followed closely by light blue and black.

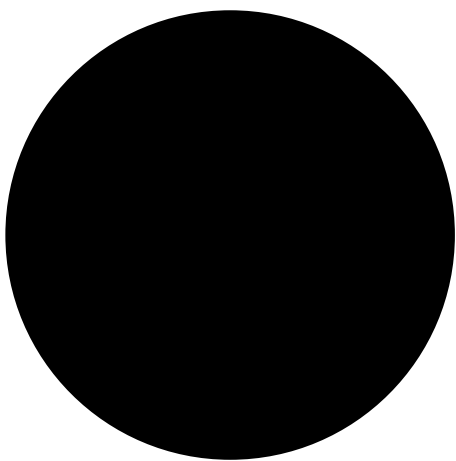

We use accent colors mostly on our designs for Social Media and Internal Communication, and on charts and graphics where a wider variety of colors is needed.

Libre Baskerville typeface family

Libre Baskerville is a web font optimized for body text. It is based on the American Type Founder’s Baskerville from 1941. We use italics to emphasize a word in a sentence, and it’s our signature style.

Software

*ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890*

SF Mono typeface family

This monospaced variant of the San Francisco typeface was created by Apple Inc. and it is used in coding environments like Xcode.

We use it less frequently, usually on small caps.

Maecenas vel vulputate tortor. Nunc tempus pharetra ante in convallis.

x/3

Graphic elements

Doodles

We use manual doodles to highlight and clarify information in our internal communication in order to bring out the human side of the brand.

Pictograms

In practical situations, pictograms can be a helpful component to swiftly represent an idea visually. Iconography should never be the main component of brand collateral.

The thick strokes, geometric shapes, and sharp edges of our iconography are inspired by the light and airy qualities of our font. Simple, descriptive, and direct icons are preferred.

If more pictograms are required, they can either be created from scratch to match the design or purchased from related collections.

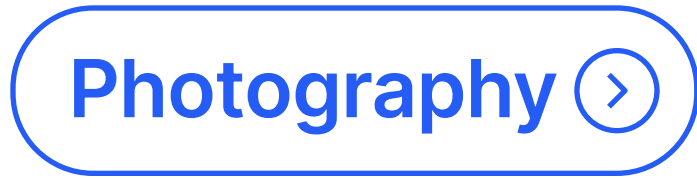

Guidance for use:

- Scale the pictogram to fit the thickness of the font's strokes.
- When using multiple pictograms, all line weights should be uniform
- Align pictograms to the grid
- Use light-colored pictograms on dark backgrounds, and vice versa
- Never overlap text or use as a watermark.

Photography

Photography can be a powerful tool for any brand to convey its message and identity. Our photography should reflect Dualboot’s technological expertise and should be modern, and clean to complement the brand’s focus on software development.

Each country is encouraged to have their own photoshoot at their local offices so that their marketing materials feature real people working at Dualboot.

OUR PHOTOGRAPHY IS:

- ✔ **Dynamic**
- ✔ **Spontaneous**
- ✔ **Bright**
- ✔ **Real**
- ✔ **Natural**

OUR PHOTOGRAPHY IS NOT:

- ✘ **Vintage**
- ✘ **Posed**
- ✘ **Clinical**
- ✘ **Basic**
- ✘ **Studio-like**

Collaborators

Still life

Environment

Collaborators

We want to showcase the brand's team of experts at work. This allows the brand to highlight its human-centered approach to software development, putting the focus on the people behind the technology. Photographs of the team working on various projects, collaborating, and brainstorming could give potential clients a glimpse into the brand's innovative process.

*Clean
Active
Professional*

Still life

We use minimalist compositions with a focus on our own merchandising, technology hardware and software interfaces. This allows the brand to showcase its products and services in a clear and concise way. The use of electronic devices, branded products and wide angles can further enhance this style, creating a high-tech look.

*Bold
Detailed
Contextual*

Environment

We aim to showcase our workspace in a way that reflects Dualboot's culture, values, and brand identity. Our office photographs should give potential clients and employees a glimpse into the work environment and atmosphere. We use wide-angle shots to capture the overall layout of our offices. When it comes to lighting, it's important to mimic natural light, as this can create a warm and inviting atmosphere.

Wide angle
Welcoming
Contextual

Incorrect

⊗ Don't use images that feel clearly staged or posed

⊗ Don't silhouette people

⊗ Don't shoot images with a deep depth of field

⊗ Do not use images with a glossy reflection

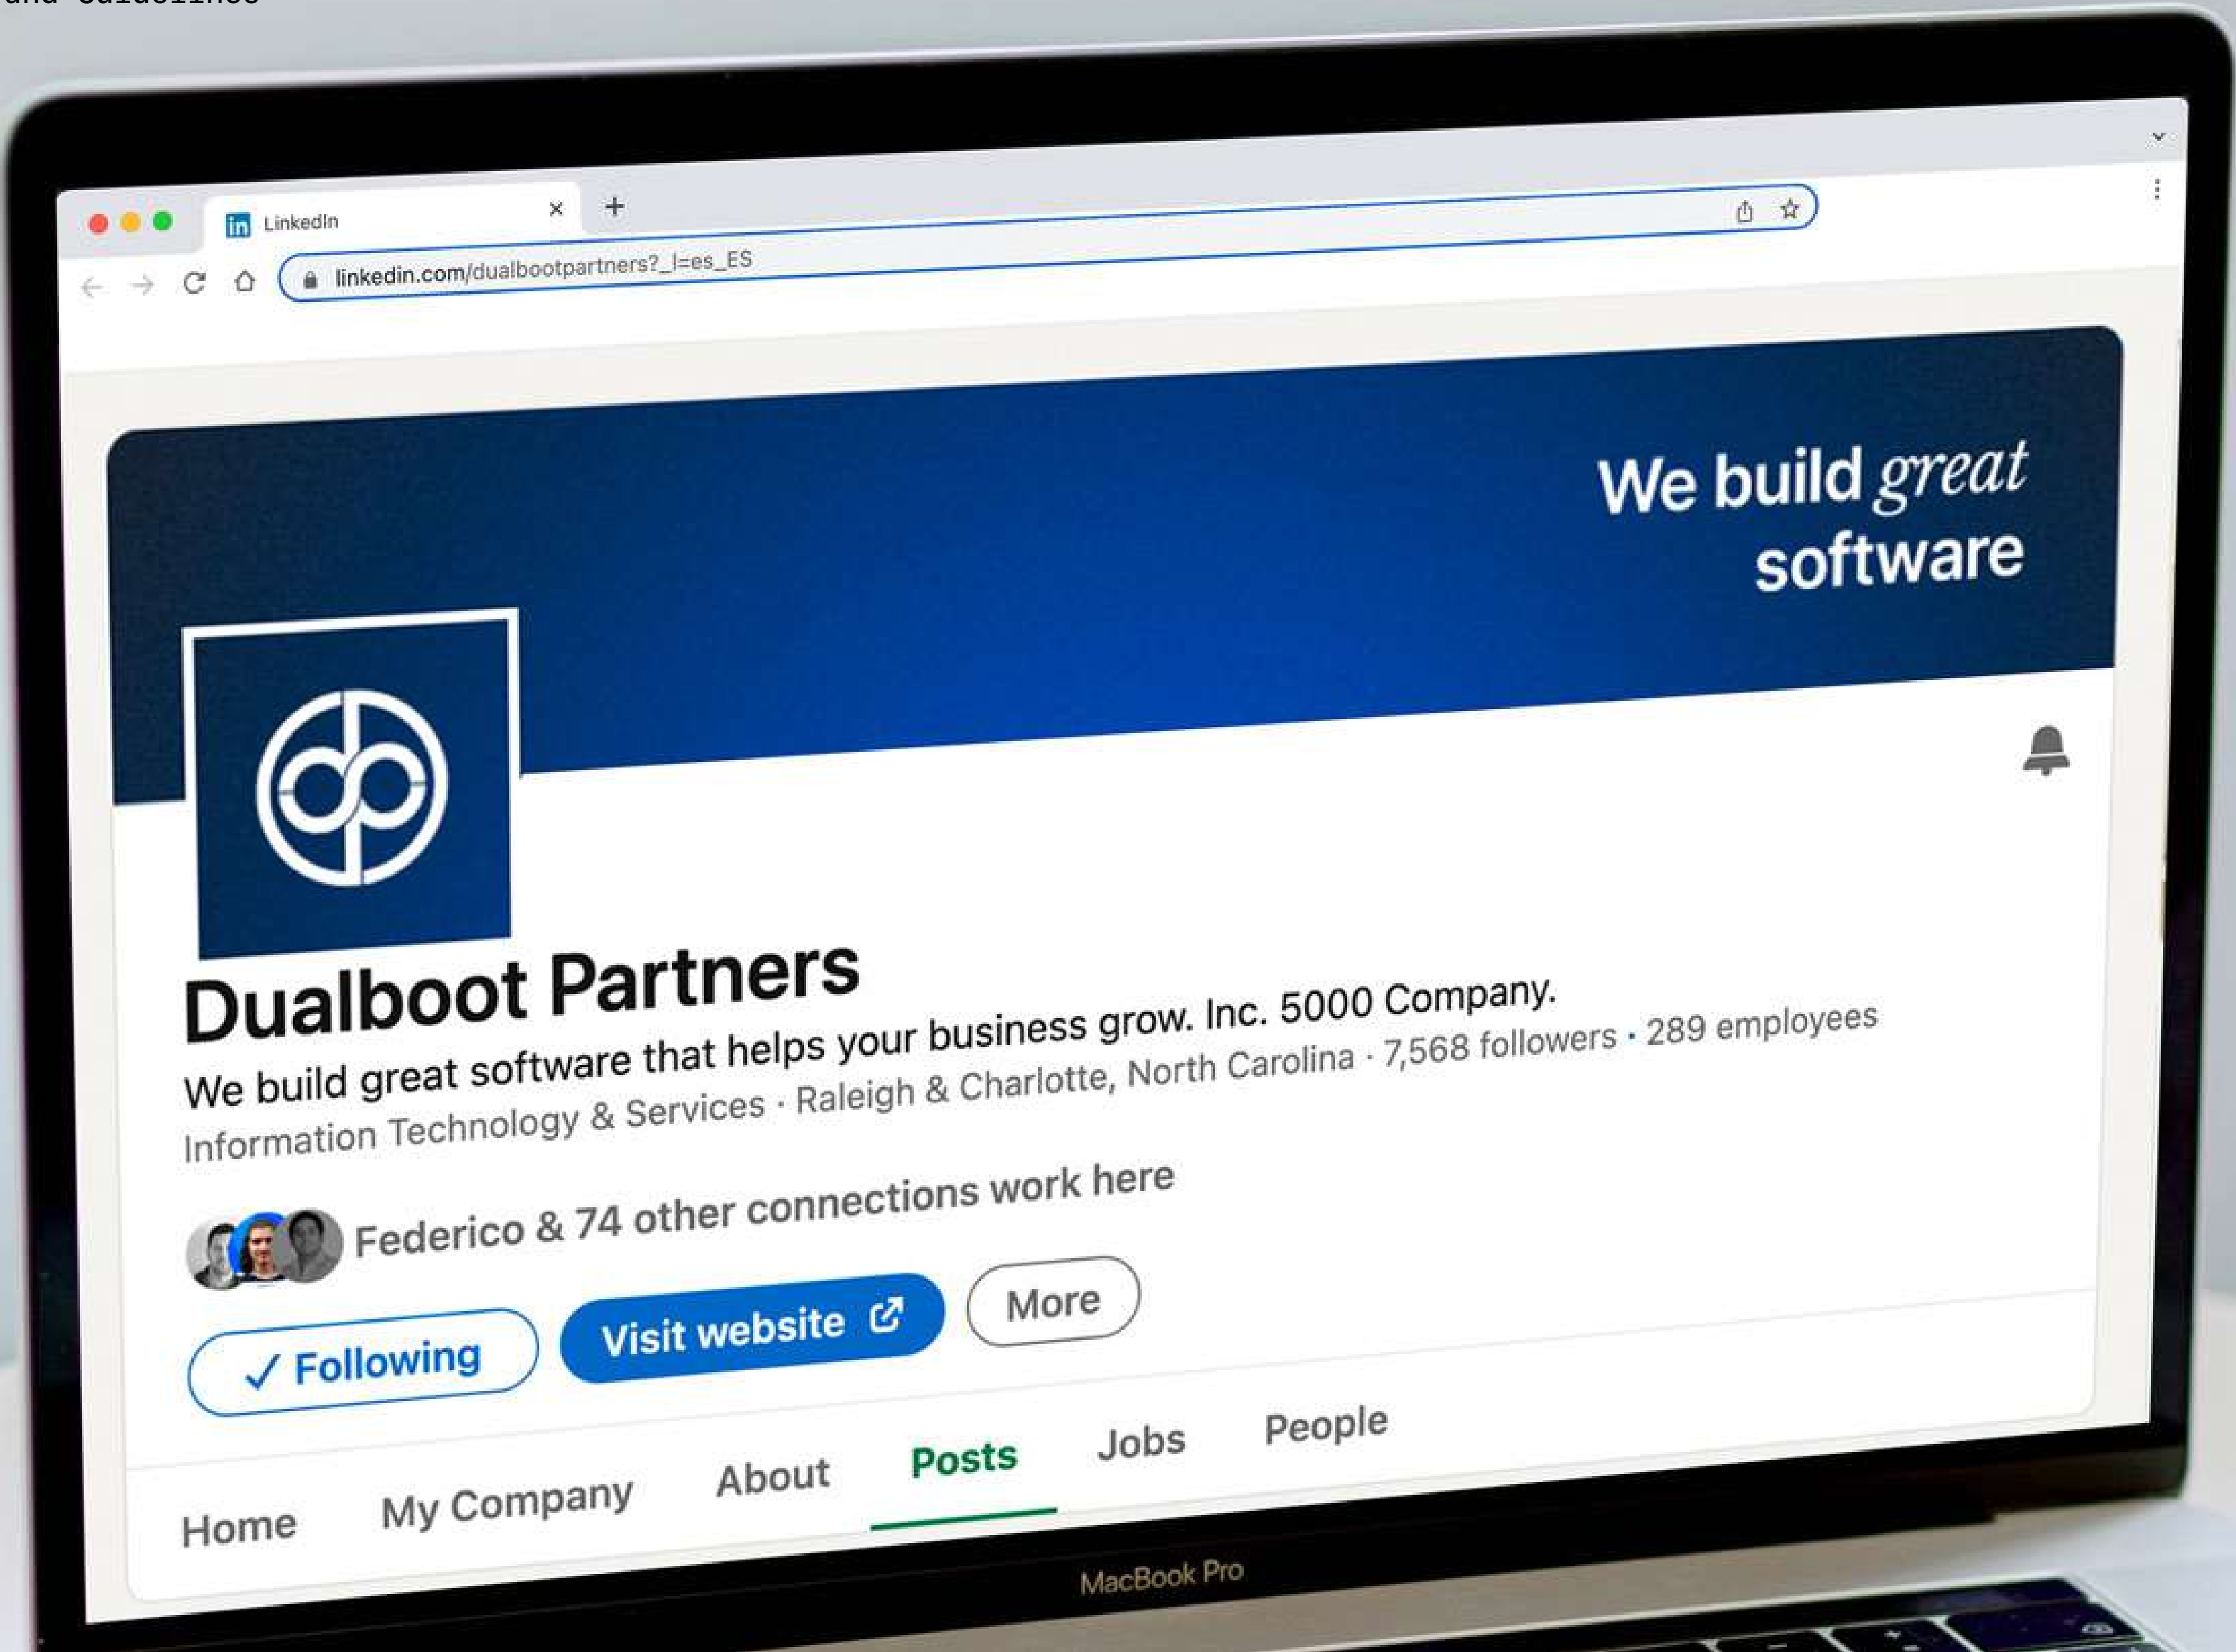

⊗ Do not use overexposed images

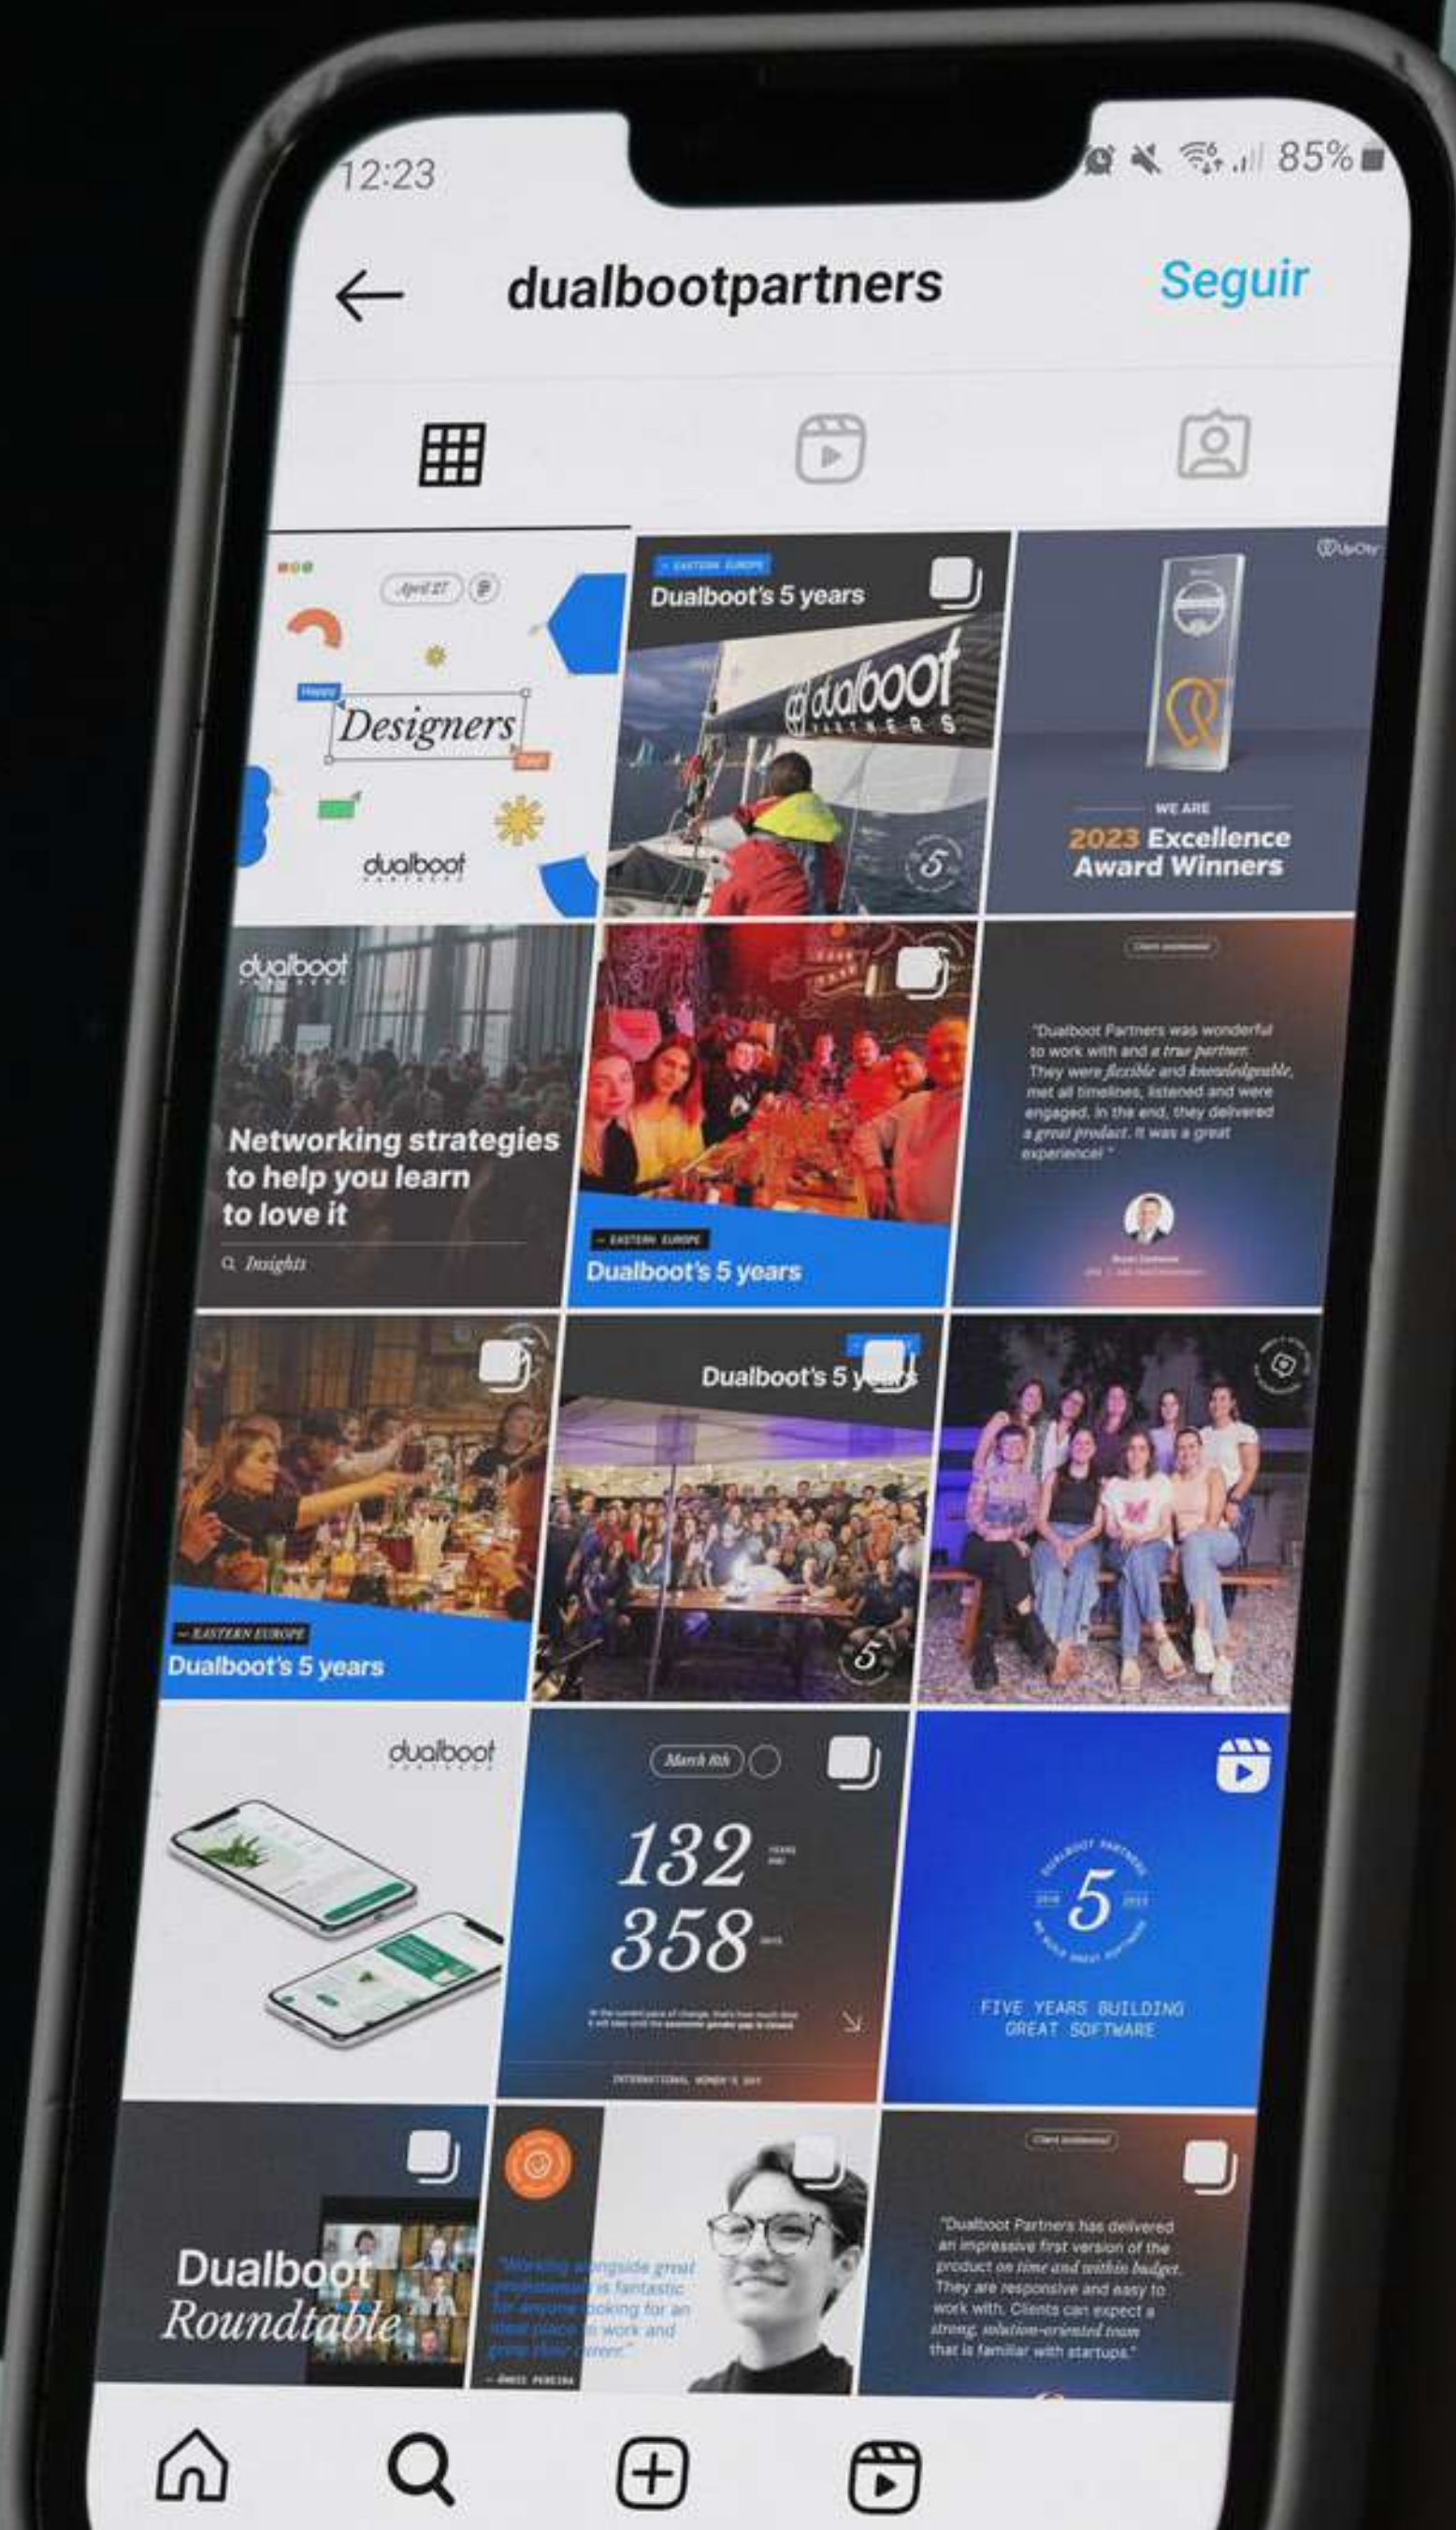

⊗ Don't have subjects looking directly at the camera
